

ES5008 Certified tooling

Undertake all heavy maintenance activity in complete confidence

energy

Engineered solution purpose

This engineered solution provides operators with the capacity to disassemble and move heavy unit components in complete confidence through the use of fully proof and load tested certified tooling.

Applicability

All Rolls-Royce compressors and power turbines.

Benefits

The use of certified tooling offers protection to the workforce involved in heavy maintenance and complies with all relevant Health & Safety regulations.

Scope of work

All new tooling is designed to the latest engineering standards.
